- Rental Unit Repairs
- Rental contracts, pricing & billing schedules
- Serialized & multi-location asset tracking
- Pickup, delivery & digital signature capture
- Returns, extensions & replacements
- Maintenance, inspections & asset lifecycle tracking
- Flexible billing with full financial visibility
- Dashboards & KPIs for rental performance

Epiphany eRentals delivers a powerful, NetSuite-native Rental Management solution designed for organizations that rent, service, and manage equipment across multiple locations and rental scenarios. eRentals automates the entire rental lifecycle—from reservation and pickup through return, billing, maintenance, and replacement—directly inside NetSuite.

Built 100% on NetSuite’s SuiteCloud platform, eRentals extends native NetSuite functionality without customization or third-party bolt-ons. Rental inventory, financials, operations, and customer transactions remain fully integrated, auditable, and visible in real time.

By leveraging dedicated rental warehouses, virtual rented locations, and serialized tracking, eRentals provides precise control over asset movement, availability, utilization, and lifecycle performance—ensuring your rental operation runs efficiently, profitably, and at scale.

eRentals uses a dashboard-driven management approach to deliver real-time insight into rental inventory, contract status, asset utilization, billing cycles, and operational KPIs. From front-office reservations to back-office accounting, teams gain a single source of truth for rental operations inside NetSuite.

Whether managing short-term rentals, long-term contracts, serialized assets, or multi-branch inventory, eRentals ensures complete visibility and operational control at every stage of the rental lifecycle.
